VIXORIA
TECHNOLOGIES

SOFTWARE + PEOPLE

A quick note from Vijit

Need one more developer for a live project?

Hi, I'm Vijit. Alongside building software at Vixoria Technologies, I help teams add .NET or React development capacity when a project needs an extra pair of hands.

HOW IT WORKS

01 Tell me the role and when you need help.

02 I review technical fit and arrange an interview.

03 The developer works in your team's tools and process.

An introduction would mean a lot.

If you know a founder, CTO or delivery manager who needs an extra developer, please connect us. I'll take it from there.

Let's talk about the role and timing.
